Title:
Emulsified diesel oil

Inventor Name(s):
LIANG Y

Patent Assignee Name(s) and Code(s):
LIANG Y (LIAN-Individual)

Derwent Primary Accession Number:
2001-309085 [33]

Abstract:

NOVELTY - The present invention aims at providing low cost and simple emulsified diesel oil producing process. The emulsified diesel oil is prepared with diesel oil 1000 pts. wt., water 350-400 pts. wt. and coconut oil alkyl diethanolamide 5-15 pts. wt. The coconut oil alkyl diethanolamide has good emulsifying property and the emulsified diesel oil will not separate and can be burnt without black smoke. In addition, the coconut oil alkyl diethanolamide has the antirust effect and thus engine protecting effect.

International Patent Classification:
C10G-031/08

Derwent Class:
H06 (Gaseous and liquid fuels including pollution control)

Derwent Manual Code(s):
H06-B04; H06-D02
